The comparatively dry conditions of May and June have diminished the benefits of the excellent autumn rains in the wheat and sheep districts. Butter production has been maintained at full seasonal volume despite the dry weather.

### 2. WOOL.

Receipts of wool into store in the year ended June constitute a record but clearances have been affected at Sydney auctions, and the carry over though larger than usual is relatively small.

The exports overseas for the twelve months ended 30th November, 1931, were equivalent to 43,415,684 bushels of wheat, including 33,836,332 bushels of grain and 201,166 tons of flour, valued in all at £5,013,635.

The exportable surplus in the current season (ending 30th November next) is estimated at upwards of 38,000,000 bushels. Direct overseas exports of wheat and grain in the first seven months of the current season have exceeded 27,000,000 bushels.

### 4. BUTTER.

The production of butter was abnormally heavy in the seven months ended January 1932. It has since decreased, but is still being maintained at a high seasonal level.

Coal production has been approximately 10 per cent. greater in the first five months of 1932, than in the corresponding months of 1931. As overseas and interstate trade have not increased there has been an appreciable increase in local demand.

(—) Denotes excess of Imports.

§ See notes below.

‡ Subject to revision.

\* Excluding gold specie valued at £401,126, £1,000,000 and £208,582 for the month of June in the years 1930, 1931, and 1932 respectively, and at £4,112,926, £1,041,056 and £2,437,990 in the years ended 30th June, 1930, 1931 and 1932, respectively.

(Australian currency values.)

The values of imports represent the cost f.o.b. port of export plus 10 per cent., and are recorded in English currency. The values of exports are the values in the principal markets of New South Wales, less bonuses on butter, &c., and are recorded in Australian currency. The excess of exports marked § above is consequently overstated. Conversely the excess of imports marked § is understated.

\* Adjusted by elimination of abnormal transactions on account of Governments.

† Unadjusted on account of amalgamation.

‡ Adjusted on account of amalgamation—Subject to revision.

§ State Government banking transactions suspended. Index not ascertainable.

Inter-bank clearings are regarded as an approximate measure of changes in the general volume of business transactions provided they are considered in conjunction with changes in price levels.

The index represents the ratio of each month's clearings to the average for the month concerned during the five years 1926–1930. This average is represented by 1,000 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months.

No adjustment has been made for normal growth or change of price levels.

\* Approximate.

† Transactions were abnormally small in June, 1930.

The amount of consideration of sales for 1931 is approximately 52 per cent., and the amount of mortgages approximately 53 per cent. of the corresponding figures for 1930, and transactions for the first six months of 1932 were respectively 77 per cent. and 38 per cent. of the amounts for the corresponding months of 1931. This decrease is partly due to a lower level of values.

## 21. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. It represents the ratio of the average prices of ordinary shares to their par values.

Par Value of Shares = 100.
